

**The 2nd SCIENTIFIC CONGRESS OF ASIA PACIFIC SOCIETY
FOR IMMUNODEFICIENCIES & 2018 SUMMER SCHOOL
MAY 5-8, 2018, Chongqing, China**

Jan.13, 2018

APSID 2018 Summer School Information

Welcome Message & Invitation

Primary immunodeficiency disease (PID) is one of the most challenging disease in children. Recently the diagnostic and therapeutic methods had been improved rapidly. To improve the medical level of PID in Asia Pacific Area and to share the PID clinical experience and basic or clinical PID study for recent years, The ASIA PACIFIC SOCIETY FOR IMMUNODEFICIENCIES (APSID) 2018 Summer School for junior pediatricians or researchers will be inaugurated in May 5-6, 2018 at Radisson hotel, Nan'An District, Chongqing, China. The summer school is hosted by Asia Pacific Society for Primary Immunodeficiencies and organized by Children's Hospital of Chongqing Medical University (the 2nd Congress of APSID will be inaugurated on 7th~8th May at the same hotel). The Summer School is oriented to clinical PID cases and to provide education and training to the doctors and researchers.

Outstanding speakers will be invited to give lectures at the school. These professors come from the United States, Britain, Japan, Hong Kong and other countries and regions, including Professor Hans D. Ochs, Professor Adrian Thrasher, Professor Andrew J Cant, Professor Kohsuke Imai, Professor Yu-lung Lau, Professor Surjit Singh, Professor Xiaodong Zhao, Dr. Pamela Lee and Dr. Huawei Mao et al. This APSID summer school will be organized by different sections such as Basic Immunology, the diagnosis of typical PID, replacement treatment, hematopoietic stem cell transplantation and others. At each section one main speaker will give generalized lecture and guide other trainees to share the cases.

All the participants are welcomed to submit abstracts and share your impressive cases at the school. Experienced PID experts will review your abstracts. The accepted cases will be presented as oral presentation or poster. The speakers at specific section will guide your presentation and help to polish your sources. All the participants interested in PID are welcomed to register in the school. Some of the school members from rural districts will be sponsored by Travel Award (Flight and Registration Fee).

Depends on our experience, there will be many doctors from various countries in the Asia-Pacific region attending this school since it provides a good opportunity for communications. If you are a pediatrician whose work is related to PID, welcome to attend this school and to share the essence of APSID Summer School to your counterparts.

Looking forward to seeing you in Chongqing!
